Local de Uso

O Local de uso é a especificação correta do lugar onde a placa cerâmica pode ou não ser assentada.

- 1 SEM TRÁFEGO (EXCLUSIVO PARA PAREDES):**
Revestimentos para paredes. Não indicado para Fachadas (Externas) e Pisos (Internos e Externos).
- 2 TRÁFEGO BAIXO:**
Ambientes residenciais internos privativos sem acesso para área externa, por exemplo Quartos. Além de locais L1. Não pode ser usado em cozinhas, corredores, garagens e áreas descobertas.
- 3 TRÁFEGO MÉDIO:**
Ambientes residenciais internos, por exemplo corredores internos, salas, banheiros, além de locais L1 e L2. Não deve ser usado em áreas externas como garagens e áreas descobertas.
- 4 TRÁFEGO MODERADO:**
Todos os ambientes residenciais, e alguns ambientes comerciais internos com baixo ou médio tráfego, sem trânsito de equipamentos ou veículos. Além dos Locais L1, L2 e L3.
- 5 TRÁFEGO ALTO:**
Todos os ambientes residenciais e comerciais com tráfego alto. Além dos Locais L1, L2, L3 e L4.

OBSERVAÇÕES IMPORTANTES:

Para áreas descobertas e/ou áreas molháveis utilizar somente produto com indicação de coeficiente de atrito **>0,4** (Vide Ficha Técnica do Produto).

Atenção: Areia e outros materiais abrasivos podem provocar riscos na superfície de revestimentos (vinil, pedra, madeira e cerâmica), PRINCIPALMENTE OS DE TEXTURA BRILHANTE, por esse motivo este produto não tem garantia a risco devido sua má utilização.

Importante: O esmalte cerâmico é uma fina camada de vidro sob o suporte poroso. A falta de uma perfeita fixação e aderência da argamassa, devido a não realização do assentamento em dupla colagem, poderá causar lascamento por impacto.

Face

O termo Face é utilizado para se referir a quantidade de mudanças no desenho do produto. Até os mármore, as pedras e as madeiras têm variações no desenho, ou seja, é improvável você ter duas peças de mármore iguais.

Elas são replicadas na cerâmica através da alta tecnologia em impressão digital, com intuito de deixar o produto mais natural possível.

Exemplo:

STATUÁRIO

Place of Use

The Place of use is the correct specification of the place where the ceramic plate may or may not be installed.

- 1 NO TRAFFIC (EXCLUSIVE TO WALLS):**
Wall coverings. Not suitable for Facades (External) and Floors (Internal and External).
- 2 LOW TRAFFIC:**
Private internal residential environments without access to the external area, for example bedrooms. In addition to L1 locations. It cannot be used in kitchens, hallways, garages and uncovered areas.
- 3 MEDIUM TRAFFIC:**
Indoor residential environments, for example internal corridors, rooms, bathrooms, as well as L1 and L2 locations. It should not be used in external areas such as garages and uncovered areas.
- 4 MODERATE TRAFFIC:**
All residential environments and some indoor commercial environments with low or medium traffic, without equipment or vehicle traffic. In addition to Locations L1, L2 and L3.
- 5 HIGH TRAFFIC:**
All residential and commercial environments with high traffic. In addition to Locations L1, L2, L3 and L4.

IMPORTANT NOTES:

For uncovered areas and/or wettable areas, only use a product with an indication of a coefficient of friction **>0.4** (See Product Technical Data Sheet).

Attention: Sand and other abrasive materials can cause scratches on the surface of coverings (vinyl, stone, wood and ceramic), ESPECIALLY THOSE WITH A GLOSSY TEXTURE, for this reason this product is not guaranteed against risks due to misuse.

Important: Ceramic glaze is a thin layer of glass under the porous support. The lack of perfect fixation and adhesion of the mortar, due to the failure to install it using double gluing, may cause chipping due to impact.

Face

The term Face is used to refer to the amount of changes in the product design. Even marble, stone and wood have variations in design, meaning it is unlikely that you will have two identical pieces of marble.

They are replicated in ceramics using high-technology digital printing, with the aim of making the product as natural as possible.

Example:

STATUÁRIO

Lugar de Uso

El Lugar de uso es la especificación correcta del lugar donde se colocará la placa cerámica puede o no estar instalado.

- 1 SIN TRÁFICO (EXCLUSIVO DE MUROS):**
Revestimientos de paredes. No apto para Fachadas (Exteriores) y Suelos (Internos y Exteriores).
- 2 BAJO TRÁFICO:**
Ambientes residenciales internos privados sin acceso al área externa, por ejemplo dormitorios. Además de ubicaciones L1. No se puede utilizar en cocinas, pasillos, garajes y zonas descubiertas.
- 3 TRÁFICO PROMEDIO:**
Ambientes residenciales interiores, por ejemplo pasillos internos, habitaciones, baños, así como ubicaciones L1 y L2. No debe utilizarse en zonas exteriores como garajes y zonas descubiertas.
- 4 TRÁFICO MODERADO:**
Todos los ambientes residenciales y algunos ambientes comerciales interiores con tránsito bajo o medio, sin tránsito de equipos ni vehículos. Además de las Localidades L1, L2 y L3.
- 5 MUCHO TRAFICO:**
Todos los ambientes residenciales y comerciales con alto tránsito. Además de las Localidades L1, L2, L3 y L4.

NOTAS IMPORTANTES:

Para zonas descubiertas y/o zonas humedecibles, utilice únicamente un producto con indicación de coeficiente de fricción **>0,4** (consulte la ficha técnica del producto).

Atención: La arena y otros materiales abrasivos pueden provocar rayones en la superficie de los revestimientos (vinílicos, piedra, madera y cerámica), ESPECIALMENTE LOS DE TEXTURA BRILLANTE, por esta razón este producto no está garantizado contra riesgos por mal uso.

Importante: El esmalte cerámico es una fina capa de vidrio debajo de un soporte poroso. La falta de perfecta fijación y adherencia del mortero, por no instalarlo mediante doble encolado, puede provocar desconchones por impacto.

Cara

El término Cara se utiliza para referirse a la cantidad de cambios en el diseño del producto. Incluso el mármol, la piedra y la madera tienen variaciones en el diseño, lo que significa que es poco probable que tengas dos piezas de mármol idénticas.

Se replican en cerámica mediante impresión digital de alta tecnología, con el objetivo de que el producto sea lo más natural posible.
